

1. Urči obvody narysovaných trojúhelníků:

$$IABI = \underline{\hspace{1cm}} \text{ cm}$$

$$IACI = \underline{\hspace{1cm}} \text{ cm}$$

$$IBCI = \underline{\hspace{1cm}} \text{ cm}$$

$$o \Delta ABC = \underline{\hspace{1cm}} \text{ cm} + \underline{\hspace{1cm}} \text{ cm} + \underline{\hspace{1cm}} \text{ cm} = \underline{\hspace{1cm}} \text{ cm}$$

$$IEFI = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$IFGI = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$IEGI = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$o \Delta EFG = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$IHII = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$IIFI = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$IJHI = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$o \Delta HIJ = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$IMKI = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$IKLI = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$ILMI = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

$$o \Delta KLM = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

2. Vypočítej obvody trojúhelníků:

a) ΔEFG : $IEFI = 5 \text{ cm}$, $IFGI = 7 \text{ cm}$, $IEGI = 8 \text{ cm}$

$$o \Delta EFG = \underline{\hspace{1cm}} \text{ cm}$$

b) ΔKLM : $IKLI = 6 \text{ cm}$, $ILMI = 70 \text{ mm}$, $IMKI = 93 \text{ mm}$

$$o \Delta KLM = \underline{\hspace{1cm}} \text{ cm } \underline{\hspace{1cm}} \text{ mm}$$

c) ΔRST : $IRSI = 11 \text{ m}$, $ISTI = 6 \text{ m } 50 \text{ cm}$, $ITRI = 7 \text{ m } 50 \text{ cm}$

$$o \Delta RST = \underline{\hspace{1cm}} \text{ m } \underline{\hspace{1cm}} \text{ cm}$$

d) ΔUVX : $IUVI = 20 \text{ km}$, $IVXI = 35 \text{ km}$, $IXUI = 19 \text{ km}$

$$o \Delta UVX = \underline{\hspace{1cm}} \text{ km}$$

e) ΔABC : $IABI = 78 \text{ dm}$, $IBCI = 52 \text{ dm}$, $IACI = 70 \text{ dm}$

$$o \Delta ABC = \underline{\hspace{1cm}} \text{ m}$$

PÍSEMNÉ NÁSOBENÍ DVOJCIFERNÝM ČINITELEM DO 1 000 000

38. Vypočítej.

	3	8	4	6	5
			.	2	0

	2	9	4	7	1
			.	3	0

	1	4	7	4	2
			.	4	6

			9	7	8
			.	6	3

		6	4	0	8
			.	4	2

	3	6	2	0	7
			.	2	5

39. Vypočítej a doplň vynechané číslice.

	1	2	3	6	5
			.	3	5
	6		8		5
3		0		5	
4		2		7	5

	7	3	4	1	0
			.	1	2
1		6		2	0
		4		0	
8		0	9		0

	1	6	1	7	5
			.	5	3
	4		5		5
	0		7
